Mobile: +86-18868104675 Address: Room401, Dorm 31, Yuquan Campus, Zhejiang University

Education

Zhejiang University, Hangzhou, China 2016 – Present
PhD candidate in Biomedical Engineering

Zhejiang University, Hangzhou, China 2012 – 2016
Bachelor of Engineering in Electronic Information Engineering GPA: 3.75/4.0 (Overall); 3.84/4.0 (Major)

Publications

Research Experience

Nano-plasmonic biosensor coupling electrochemistry to monitor heavy metal ions with nanoarrays Ongoing

- Deposited anodic aluminum oxide (AAO) to fabricate nanoarrays with gold nanoparticles through cyclic voltammetry (CV)
- Designed specific DNA strands that were sensitive to heavy mental ions and could self-assemble on gold nanoarrays
- Designed the reaction container with SolidWorks and had it printed by 3D printing technology in order to experiment efficiently and save samples
- Assembled DNA with nanoarrays and used the biosensor to detect Hg^{2+} through localized surface plasmon resonance (LSPR) spectroscopy
- Used electrochemical methods-differential pulse voltammetry (DPV) and square wave voltammetry (SWV) coupled with LSPR for Hg^{2+} detection to reach higher sensitivity

Optical biosensor of molybdenum disulfide (MoS_2) with gold nanoparticles for explosive detection 03/2017 – 09/2017

- Synthesized the composites of MoS_2 with gold nanoparticles and evaluated the composites with transmission

electron microscopy (TEM), scanning electron microscope (SEM), Raman spectra, etc.

- Functionalized the nanocomposites with specially-designed peptides that could capture TNT molecules
- Experimented with the biosensor to detect explosives by absorption spectra with an optical system
- Analyzed data using softwares (MATLAB, FDTD Solutions, CrystalMaker, etc.) and composed the paper

Analysis and design of high performance wireless power delivery using on-chip octagonal inductor in 65-nm CMOS 09/2014 – 08/2015

- Optimized the length-width ratio of MOS transistors applied in the rectifier
- Employed Cadence to simulate the rectifier and achieved its optimal rectification efficiency

Industrial exhaust gas treatment by plasma technology 09/2013 – 09/2014

(supported by Students Research Training Program)

- Conducted research on the application, main scientific problems, mechanism and degradation process of volatile organic compounds (VOCs) purification treatment by low-temperature plasma technology
- Carried out experiments to determine three VOCs and organized the report; won an "Excellent" evaluation

Internships and Competitions

Assistant Application Engineer, Joulwatt Technology 08/2015 – 06/2016

(Background: Joulwatt Technology is an America-invested company headquartered in the United States and focuses on the research of power management chip)

- Built a behavior model of TRIAC dimmable boost solution based on chip JW1807
- Optimized the system simulation, completed the evaluation board and tested its performance

Competitions:

- **A portable mobile device for non-invasive glucose detection**, Second Prize in the 15th "Challenge Cup" University Student Extracurricular Scientific Works Competition of Zhejiang Province, Fourth Designer 03/2017 – 05/2017
- **Photo-catalysis Sewage Treatment System**, Second Prize in the 8th National University Student Social Practice and Science Contests on Energy Saving & Emission Reduction, Second Designer 03/2015 – 08/2015

Honors and Awards

10/2017	Academic Scholarship
06/2016	Outstanding Graduates of Zhejiang University; Certificate for Excellent Engineer Training Program
12/2015	First Class Scholarship for Excellence in Research and Innovation; Merit Student; Third Prize of the National Talents Training Base; Third Class Scholarship for Outstanding Students
12/2014	Scholarship for Excellent Social Practice; Outstanding Student Leader
12/2013	Merit Student; Third Class Academic Scholarship; Third Class Scholarship for Outstanding Students

Extracurricular Activities

- Supported education as a volunteer teacher in a rural area 07/2013
- The Vice President of the Student Association Union of Zhejiang University 09/2012 – 06/2014

Skills

Computer skills: C; VHDL; MATLAB; Cadence; Altium Designer; SolidWorks; FDTD Solutions; CrystalMaker; etc.

Lab skills: electrochemistry workstation; SEM/TEM microscope; Raman spectroscopy; oscilloscope; etc.
