### **Education**

### Zhejiang University, Hangzhou, China

2016 – present

Ph.D. student in Biomedical Engineering

### Zhejiang University, Hangzhou, China

2012 – 2016 GPA: 3.75/4.0

Bachelor of Engineering in Electronic Information Engineering

### Research Experience

### Nano-plasmonic biosensor coupling electrochemistry to monitor heavy metal ions with nanoarrays ongoing

- Deposited anodic aluminum oxide (AAO) to fabricate nanoarrays with gold nanoparticles through cyclic voltammetry (CV)
- Designed specific DNA strands that were sensitive to heavy mental ions and could self-assemble on gold nanoarrays
- Designed the reaction container with SolidWorks and had it printed by 3D printing technology in order to experiment
  efficiently and save samples
- Assembled DNA with nanoarrays and used the biosensor to detect Hg<sup>2+</sup> through localized surface plasmon resonance (LSPR) spectroscopy
- Used electrochemical methods-differential pulse voltammetry (DPV) and square wave voltammetry (SWV) coupling with LSPR for Hg<sup>2+</sup> detection to get higher sensitivity

### Optical biosensor of molybdenum disulfide (MoS2) with gold nanoparticles for explosive detection

03/2017 - 09/2017

- Synthesized the composites of  $MoS_2$  with gold nanoparticles and evaluated the composites with transmission electron microscopy (TEM), scanning electron microscope (SEM), Raman spectra, etc.
- Functionalized the nanocomposites with specially-designed peptides which could capture TNT molecules
- Experimented with the biosensor to detect explosives by absorption spectra with an optical system
- Analyzed the data with softwares (MATLAB, FDTD Solutions, CrystalMaker, etc.) and wrote the paper

# Analysis and design of high performance wireless power delivery using on-chip octagonal inductor in 65-nm CMOS 09/2014 – 08/2015

- Optimized the length-width ratio of MOS transistors applied in the rectifier
- Employed Cadence to simulate the rectifier and achieved its optimal rectification efficiency

### **Patents**

- Q. Liu, S. Li, Q. Zhang, Y. Lu, <u>J. Wu</u>, "A method to reduce and deposit composites of graphene and 3aminophenylboronic acid by one step for glucose detection", Publication No: 201610873894.4

### **Internships and Competitions**

### **Assistant Application Engineer, Joulwatt Technology**

08/2015 - 06/2016

(Background: Joulwatt Technology is an America-invested company headquartered in the United States and focuses on the research of power management chip)

- Built a behavior model of Triac dimmable boost solution based on JW1807
- Optimized the system simulation, finished the evaluation board and tested its performance

#### Competitions

- **A portable mobile device for non-invasive glucose detection**, Second Prize in the 15<sup>th</sup> "Challenge Cup" University Student Extracurricular Scientific Works Competition, the fourth designer 03/2017 05/2017
- **Photo-catalysis Sewage Treatment System**, Second Prize in the 8<sup>th</sup> National University Student Social Practice and Science Contests on Energy Saving & Emission Reduction, the second designer 03/2015 08/2015

### **Honors and Awards**

10/2017	Academic Scholarship
06/2016	Outstanding Graduates of Zhejiang University; Certificate for Excellent Engineer Training Program
11/2015	First-class Scholarship for Excellence in Research and Innovation; Merit Student;
	Third prize of the National Talents Training Base; Third-class Scholarship for Outstanding Students
11/2014	Scholarship for Excellent Social Practice
11/2013	Merit Student; Third-class Academic Scholarship; Third-class Scholarship for Outstanding Student

### **Extracurricular Activities**

Title of Five-Star Volunteer (the highest rank of volunteers in Zhejiang University)

•	Volunteered in the press center of G20 Summit to help foreign and Chinese media	09/2016
---	---	---------

• Supported education as a volunteer teacher in a rural area

07/2013

Title of Outstanding Student Leader (three times)

•	The Presidium Assistant, Students Associations Union of Zhejiang University	09/2012 - 06/2014
•	Leader of the Secretariat, Youth Marxist Training Center of Zhejiang University	09/2014 - 06/2015

Visiting group to Hong Kong

11/2013

- Took classes in Peter F. Drucker Academy to learn management knowledge
- Visited campuses of several universities in Hong Kong

### Skills

Computer skills: C; VHDL; MATLAB; Cadence; Altium Designer; SolidWorks; FDTD Solutions; CrystalMaker; etc. Lab skills: electrochemistry workstation; SEM/TEM microscope; Raman Spectroscopy; oscilloscope; etc.
